

<<component>>
Issue Status & Resolution

A user can click on this header to change the status between Open, Trivial, Critical, Resolved and other states we want

Tags

Here we'll tag associated issues, projects, and other common factors to link to other issues

Updates

All updates entered in the textbox below will be logged here in order with an attached user and time stamp

A scroll bar will appear to the right of the box in case the log extends past the allotted space

This text box will be available for any updates made to the issue in question

This issue has been Resolved

Issue Description

This is a sample description provided for the mockup of the issue description and resolution page

Issue Resolution

A summary of the resolution will appear here (if completed) along with any postmortem analysis that may be appropriate
